# SANTA FE BUILDING

*"Best Known Business Address in Dallas"*

**Units One and Two Now Nearing Completion**

## OFFICE BUILDING—Unit No. 1

In the nineteen-story building facing Commerce Street you will find private offices of one or more suites. Discriminating business men seeking offices are invited to inspect the new Santa Fe Building. Office space is available in large or small units at fair rents.

## SALES BUILDING

*Ten-Story Portion Adjoining Office Building--Entrance on Commerce*

The Santa Fe Building is the Southwestern headquarters for many of the leading manufacturers of the Nation. When in Dallas be sure to visit this building, where you will find conveniently grouped under one roof, complete stocks of merchandise and extensive displays which are permanent throughout the year.

The Santa Fe Building is one of the most convenient buildings in Dallas, centrally located within easy distance of the railroad terminal, hotels and shipping district. During the buying season of the year, out-of-town buyers will find it convenient to begin their buying trips here. Frequently they will be able to complete an entire season's buying within the building.

## WAREHOUSES

In units 2, 3 and 4, facing Jackson, Wood and Young Streets, there are still some available warehouse spaces with individual elevators, docks, private tracks in the basement, eliminating surface operations and interferences. The Santa Fe Building extends four blocks--from Commerce to Young Street. The entire four units are connected by a subway.

## Seventy-five New Business Concerns Locate

DALLAS continues to attract the attention of manufacturers throughout the country as the logical distributing point for the Southwest, as is shown by the opening of several important distributing branches during February. Seventy-five new business concerns opened in Dallas during the past month, making a total of 145 new firms for the year.

A recently organized Dallas concern that will have a Nation-wide business is the Moore Process Chemical Company, organized by Dr. Landon C. Moore, who is president. The concern handles a compressed air chemical process for paint removing that is the product of the research laboratory of Dr. Moore. The process can also be adapted to removing paint from steam and electric railway cars and steamships.

A State charter has been granted to the Home Building & Loan Assn., with a capital stock of \$10,000,000.

The Cantilever Shoe Store System has opened a Dallas branch in the Pacific Avenue front of the Medical Arts Bldg.

The Alaskan Fur Company has leased the O'Conner Building at 1424 Main Street and will remodel the 3-story structure.

The Hunter Manufacturing & Commission Company, with headquarters in New York, maintaining twelve offices in foreign countries, have selected Dallas as their twelfth office in the United States.

The Steel Equipment Corporation, of Avanel, New Jersey, manufacturing steel office furniture, safes and shelving, have opened offices in the Santa Fe Building.

The Hul-Lo-Wen Fireproof Everlasting Homes Company, of Detroit, Mich., have established offices in Dallas for the erection of fireproof residences.

The Cooper Corporation, of Cincinnati, Ohio, manufacturers of automobile tires, tubes etc., are now distributing locally from the Santa Fe Building.

The American Appraisal Company has opened offices here.

Clarence Saunders, former owner of the Piggly-Wiggly stores, has opened three retail stores in Dallas. A detailed list of new concerns follows:

### NEW CONCERNs

Associated Cleaners of Dallas, Assns. and societies; First Unit, 2nd flr. Santa Fe Bldg., X-4500.

Alford Oil Company, oil company; 212-15 Slaughter Bldg.; X-2141.

American Acid Works; Eagle Ford Road, across from Clayco Refining Co.; X-6728-J.

Avalos Barber Shop; 517 Griffin St.; X-3611.

The American and Venetian Marble Company, tile floors and walls; 412 S. St. Paul St.; Y-3502.

Angus Flower Shoppe, florist; 5102 Columbia Ave.; H-3698.

Barnes Produce, produce and fruits; 309 S. Pearl St.; Y-2687.

# Are You Paying Too Much for Business?

**G**N this age of increased cost of travel and higher salaries, the average business problem isn't one of volume, but *volume at a profit*.

**C**How much have you been paying for business? With your annual statement before you it is a very easy matter to answer this question. Perhaps like a great many other executives, you feel that you have been paying too much; profits are not in keeping with the volume.

**C**There is a way to lower selling costs; to reduce the amount you are paying for business and thereby increase your profits. We have proved this statement for many of the leading executives of the Southwest. If you are interested, communicate with us.

## Autocars Give Real Service with Minimum Amount of Upkeep

Mr. Hyman Pearlstone, President of the Boren-Stewart Co., Dallas, Texas, recently wrote the Autocar Direct Factory Branch at 2701 Main St. as follows:

"We take pleasure in stating that the operation of the two Autocars purchased from you—one in 1923 and one in 1924—has proven highly successful.

"Prior to purchasing these two cars, we operated an Autocar about six years and this truck gave us better service and stood up longer than any heavy truck that we operated during that period.

"It is our opinion that no one can go wrong in purchasing an Autocar if they are looking for real service—minimum upkeep and a long-life truck."

# City Planning Stressed By Twenty-five-Year Program Committee

D 48  
eag

**F**UNDAMENTAL lines of effort along which Dallas citizens should co-operate to insure continued growth of the city along symmetrical lines in the interest of future generations are outlined in the progress report of the Twenty-Five-Year Program Committee of the Chamber of Commerce to President T. M. Cullum and the Directors. The committee was appointed early in 1924, has held many meetings and will continue to function; this report, as mentioned, being merely one to show the progress of its deliberations. The committee was not requested to investigate specific projects and so has limited discussions and the report to fundamental lines of effort.

Frank McNeny, of McNeny & McNeny, is chairman and other members of the committee follow: Nathan Adams, American Exchange National Bank; J. K. Hexter, Central State Bank; R. H. Stewart, City National Bank; T. L. Bradford, Southwestern Life Insurance Co.; Simon Linz, Linz Bros.; Geo. A. Trumbull, Huey & Philp Hdw. Co.; Karl Hoblitzelle, Interstate Amusement Co.; E. Gordon Perry, Perry Motor Co.; J. Perry Burrus; S. B. Perkins, Perkins Dry Goods Co.; J. Edgar Pew, the Sun Company; T. M. Cullum, Cullum & Boren Co.; R. H. Shuttles, Shuttles Bros. & Lewis; Edward T. Moore, Sims Oil Company; C. E. Ulrickson, Trinity Portland Cement Company; Edward Titche, Titche-Goettinger Co.; George B. Dealey, A. H. Belo & Co.; J. W. Everman, City Supervisor of Public Utilities; A. B. Flanary, Flanary & Aldredge; Hugh E. Prather, Flippin-Prather Realty Co.; W. E. Greiner, Greiner-Kelly Drug Co.; T. P. Junkin, Investment Securities Company; S. W. King, S. W. King & Co.; Judge J. E. Cockrell, Cockrell, McBride, O'Donnell & Hamilton.

## Important Phases Considered

THE report of the committee, whose appointment is so closely in line with the slogan of Dallas, "The City Where Men Are Looking Forward," is as follows, with some of

the most important subjects considered listed at the outset:

Among the many matters discussed in our meetings, the following may be mentioned as indicating the scope of our discussions:

Water supply.

Auditorium.

Suburban additions—regulation and annexation.

Large county parks to supplement smaller city parks.

Developing existing parks and connecting them by boulevards.

Better main highways into and through Dallas, especially the connecting links between the city and county pavements.

Special tax for city pavement maintenance, to avoid directing maintenance funds to new pavement projects.

Development service work in trade territory.

Transportation problems, including city street railway matters, as well as those relating to railroads and interurbans.

Street widening and extension problems.

Flood control and the relation to this problem of reservoir construction on the upper watershed.

Use of southwestern capital to develop southwestern industries.

How to insure sound legislation as an encouragement to out-of-state business institutions to make permanent investments in Dallas.

Dallas northwest highway to give direct connection with Panhandle and Plains country.

Consolidated rural high schools for county districts.

Railway mail facilities into and out of Dallas.

More late trains leaving Dallas at night.

Beautifying approaches to city along railroads, and highway approaches to our residential districts.

Better fire prevention, health protection and public safety work.

## Co-operation Asked

IN asking for the co-operation of the citizenship of Dallas in carrying forward a constructive program for the future, the twenty-five-year program committee of the Chamber of Commerce feels that it would be

recreant to its duty if it did not express its appreciation of the whole-hearted, city-wide spirit of pulling together which has characterized our civic and commercial efforts of the past, and which has been the largest single contribution to the present supremacy of our city. The committee calls upon a united citizenship to jealously guard the famous "Dallas Spirit" and to redouble its efforts in the direction of community co-operation for a greater Dallas.

The commercial supremacy of Dallas is unquestioned. This has been a magnet to draw thousands of industries here. Permanent leadership, however, demands that we look and plan a long ways ahead.

Much has also been done to make Dallas a delightful place in which to live, but a great deal remains to be done to make it the city beautiful which will attract the many who have accumulated a competence and desire to locate amid surroundings conducive to cultural development.

Dallas is endowed with many natural advantages as a residential city and a proper development of these resources on an extensive scale will add dignity and charm as nothing else can, and at the same time prove a tremendous commercial asset. As one of our members has so well expressed it, "Dallas' commercial and industrial interests more or less meet their future situations through the impetus of competition, but it is the other side of life, namely, the beautification of the community, that is apt to be neglected, and, therefore, it is along this line that I think our strongest recommendations should lie."

## City Planning Stressed

**A**ND INTERESTING feature of the work of the committee which developed early in its deliberations is that its members are interested more in "City Planning" than any other subject discussed. The committee realizes that in making suggestions along this line it might be considered as trespassing upon the work of our splendid Kessler Plan Association and the duties of our City Plan Commission and other governmental bodies; yet it feels that there can be no con-

flict of interests, as we are all working harmoniously for the good of Dallas.

The committee recommends that steps be immediately taken to put into effect a complete city plan for Dallas and vicinity, and wishes to go on record to the effect that in its judgment the Kessler Plan should be followed.

We recommend that the City Commission be requested to include in its budget a sufficient sum for the purpose of republishing and distributing the Kessler Plan, including all later revisions made under Mr. Kessler's personal direction, and for the employment from time to time, as found desirable, of city planning consultants of national reputation to assist in carrying out the Kessler program. The Kessler Plan, among other things, includes a proper system of zoning for the protection of property values, as well as the symmetrical development of the city.

#### Small Progress Made.

ALTHOUGH it is several years since Mr. Kessler first began his very exhaustive study of Dallas' future needs and made the first of his many recommendations embodied in the complete Kessler Plan, very small progress has been made toward its fulfillment. In the meantime, the city has doubled in population, traffic conditions have grown far more acute and mounting real estate values have more than doubled the cost of some of the improvements proposed, many of which are twice as urgent now as then.

Further delay means the need will be more and more acute and the cost will be still higher. Although the cost is now great we believe it the part of good business, and that money will be saved in doing it, to systematically carry out the far-reaching improvements embodied in the Kessler Plan to their entirety. Desiring to be as helpful as possible, we have appointed a special committee to work out the details of some practical and equitable method of financing the most important of the Kessler Plan improvements through a given period of years, so that the tax rate would not be materially increased in any one year. This would probably take the form of a large bond issue. Several of the most progressive American cities are now following this plan, including St. Louis, Mo., Dayton, Ohio, Albany, N. Y., and others. The personnel of this committee follows: Edward Titche, chairman; S. W. King, Karl Hoblitzelle, George B. Dealey, J. Perry Burrus and T. M. Cullum.

Certainly the total cost of such improvements is not properly chargeable to benefited real estate in its immediate vicinity. This system has made such projects slow of consummation. When a great thoroughfare is widened or straightened the entire citizenship is benefited, and should pay its just proportion of the cost in like manner as the adjoining benefited property. Furthermore, it should not be forgotten that the proposed Kessler Plan improvements will not only increase existing assessable property values, but will result in new

development work by private initiative, which will create entirely new assessable property values.

#### Tax Limit Nearly Reached

ALTHOUGH our present tax limit has been practically reached already, we understand there are several ways in which this could be increased by the necessary legislation.

In carrying out the Kessler Plan, we believe special attention should be given to the poorer sections of the city, with a view to eliminating as far as possible what is sometimes termed "tenement" districts in the bigger cities. Nor should we forget that our colored population represents a considerable portion of the community, and that the environment under which they live should receive careful study.

It is the opinion of the committee that the Kessler Plan street widening and extension projects in the business district should receive first consideration, even ahead of flood control work or other important features of the plan.

The Chamber of Commerce will have wrought well, if it can help the city and county governments, the City Plan Commission, the Park Board and the Kessler Plan Association to develop a greater and greater interest among our citizens in a constructive city planning program.

#### Southwest Development

THE important relation that exists between the City of Dallas and the so-called Southwest trade territory, including Texas, Louisiana, Arkansas, Oklahoma and New Mexico, should, in the opinion of this committee, receive more consideration in the future.

In the long run, Dallas cannot grow faster than her trade territory. Our future success as a city, and particularly as the leading community in the Southwest, depends on the growth and development of the cities, towns, villages and individual farms throughout this area.

Based on the experience of other cities, more than seventy-five per cent of all the business done by our large concerns is with customers located not in Dallas, but in the communities of Texas and adjoining States. With this single fact of primary importance before us, would it not be wise for Dallas to give serious consideration to an organized program for helping these communities become more prosperous?

St. Louis, Los Angeles and a few other cities have done this effectively by the organization of a development service bureau in the Chamber of Commerce through which practical assistance in agricultural and community problems is given on request and without charge to any community in the territory. As a result of this friendly service to a neighbor, the prosperity of that locality is placed on a sounder basis, its purchasing power is increased, and its people have an increased desire for communication and trade in the city which gave them the service.

At the present, our Chamber is cooperating along these lines with the

communities of Dallas County, and we recommend that at the earliest possible date provision be made to provide a real development service for communities throughout our Southwest trade territory. In our opinion this activity, as much as any other single thing, will make it possible for Dallas to effectively maintain her leadership in this territory.

#### More Highways Needed

NOTWITHSTANDING the fact that the wholesale merchants of Dallas offer semiannually to pay the round-trip fare to Dallas of retail merchants in this trade territory, during the last so-called "market season" more than 40 per cent of the visiting merchants came via automobile.

This illustration serves to emphasize the constantly increasing importance to the city dweller of good highways, to say nothing of the importance to the farmer to have at his door a means of access to and from markets and the resulting increase in land values.

When a complete system of improved highways extends across our State in both directions and connects up with highways from Northern, Eastern and Western cities, tens of thousands will annually be added to the number of winter tourists who frequent this section.

Texas has heretofore laid little stress to its claims as a winter resort, but its mild climate, abundance of sunshine and excellent hotel and apartment accommodations can be capitalized into a tremendous asset through appropriate advertising.

We recommend that the Chamber of Commerce increase its efforts to have Dallas connected by permanent improved highways with the principal communities in Texas and adjoining States.

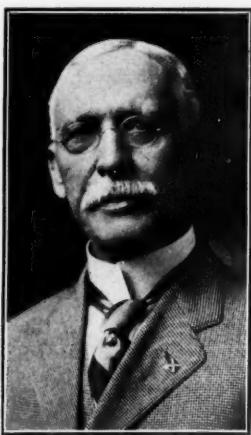

#### Transportation Suggestions

YOUR committee has given serious consideration to the problem of increasing the transportation facilities of Dallas, in order that such facilities adequately meet the demands of the future. In this connection, members of the committee have taken an active interest in an endeavor to effect an arrangement whereby the Fort Worth & Denver City Railway (Burlington System) would come directly into Dallas and provide terminal facilities here for themselves and the Trinity & Brazos Valley Railroad (also a link in the Burlington System). Indications now are that these efforts on the part of the Chamber of Commerce and your committee will be substantially rewarded in the very near future.

The officials of the Gulf, Colorado & Santa Fe Railway are fully aware of the growing importance of Dallas as a manufacturing and shipping center. Interviews have been had with prominent officials of the Santa Fe System and several tentative plans have been discussed with them for an enlargement of this system's facilities both in and into Dallas. Your committee can report with assurance that the officials of this great rail-

(Continued on page 55)

## Making Entertainment Plans for Veterans

COL. J. T. TREZEVANT  
Chairman, General Arrangement Committee

PERFECTING of the organization to arrange for and handle the entertainment of the United Confederate Veterans' Convention, to be held in Dallas, May, 19-22, is being rapidly worked out under the direction of Col. J. T. Trezevant, chairman, and George Waverley Briggs, vice chairman, of the general arrangements committee of more than fifty named by Mayor Louis Blaylock, acting with authority of the City Commission.

W. D. Jones, president of the Presidents' Club, has accepted the chairmanship of the Finance Committee, the members of the committee being the personnel of the Presidents' Club, which is comprised of the presidents of the various service clubs of Dallas, most of which hold weekly luncheons. Various other committees are being named. It is estimated that \$40,000 will be needed for the entertainment of the Veterans, Sons of Veterans and affiliated women's organizations and other visitors, the total number of which may pass 30,000. Some of Dallas' best speakers presented the task of Dallas and the finance committee before meetings of various local organizations.

Dallas has entertained the Veterans but once before and that was at the beginning of this century. It is assured that Dallas will never have the opportunity to entertain them again, as other Southern cities will be in line, and the youngest of the Veterans is now more than three-score and ten years of age.

## Political Science Body to Meet Here

The Southwestern Political and Social Science Association will meet in Dallas on Monday, Tuesday and Wednesday March 30, 31 and April 1. General sessions will be held mornings and afternoons of all three days. On Monday night a banquet under

the auspices of the Knife and Fork Club will be tendered visiting delegates. On Tuesday night, Southern Methodist University will be host to the Association in a fellowship meeting and buffet supper. The latter affair is in charge of a faculty committee, Professor Lucien Pritchett, chairman. Professor H. H. Guice of S. M. U. is in charge of publicity.

All sessions will be held at the Jefferson Hotel, which has been named official headquarters.

Dr. W. M. W. Spaln, president of University of Texas, is president of the Association, George B. Dealey of Dallas, vice-president, and Professor O. Douglas Weeks, of University of Texas, secretary.

will work is the Superintendents' Division of the National Educational Association, which would bring some 12,000 to 14,000 in February of that year.

Upon invitation from local produce men and representatives of the Chamber of Commerce, the Texas Poultry, Butter & Egg Association, meeting at Fort Worth recently, chose Dallas for its 1926 spring convention. The National Oil Mill Superintendents' Association is a convention not heretofore announced in this magazine. It will hold its convention at the Jefferson Hotel May 27-29. In the Confederate Veterans' Reunion, to be held here May 19-22, Dallas will have one of the largest gatherings ever staged in Texas. The Texas State Manufacturers' Association will have its annual meeting here, beginning May 25.

The Publicity Department of the Chamber of Commerce has arranged for articles and photographs regarding Dallas to appear in the Hardware Age, New York, the Hardware World, St. Louis and the Southern Hardware & Implement Journal, Atlanta, in connection with the joint convention of the Southern Hardware Jobbers' Association and the American Hardware Manufacturers' Association, here April 21-24.

## Important Conventions Announced

DALLAS has recently secured some most important conventions, the largest of which is that of the State School Teachers' Association, which will bring some 6,000 to 7,000 here for Thanksgiving Day this fall and the two following days. It is considered, from the standpoint of the Convention Department of the Chamber of Commerce, one of the most valuable and important, if not the most important, of the annual State conventions.

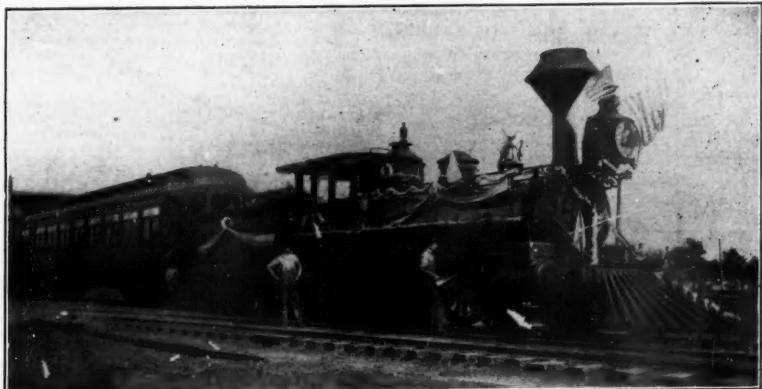

The Convention Department has approximately 100 conventions listed for 1925, including those that already have been held this year, and Dallas will be chosen for a number of other conventions for this year. The Departments, also has listed some 40 conventions, so far, for 1926, and has started work on several for 1927 and 1928. One of the most important conventions for 1927 for which Dallas

## THE PROOF OF ADVERTISING

History Prof.: "And when Lord Chesterfield saw that death was near he gathered all his friends around him. But before he breathed his last he uttered those last immortal words. Who can tell me what the dying words of Lord Chesterfield were?"

Class (in chorus): "They Satisfy!"

## All Aboard for Good Will Tour In 1894!

Engine No. 7 of the Texas Trunk Railway (now T. & N. O. Railway) is shown above, getting ready to start out, March 25, 1894, with the old Dallas Commercial Club's Goodwill Tour train. Philip Sanger was president and G. R. Reynolds, secretary of the Dallas Commercial Club, now the Chamber of Commerce, at the time of this tour. Frank Myers was engineer, T. J. Stinson conductor, and A. Bell the fireman on the train. This picture is timely in connection with the 24th annual Goodwill Tour of the Chamber of Commerce, the dates of which will be April 7-14. The contrast between this engine and the locomotives of today is even less marked than Dallas of 1894, with its 40,000 people, and Dallas of today with 250,000, and throughout the years these tours have aided materially in the growth of the city.

# The Lengthening Shadow of the Dallas Skyline

EVERY year has witnessed the growth of the famous Dallas skyline, claimed by many to be the second most impressive skyline in America, until today there are 107 buildings from 5 to 29 stories in height. These buildings represent a total of 839 stories and if placed end to end they would pierce the sky to a height of 11,746 feet or more than two miles. If a single man owned them he would be classed among the world's richest men, as they represent a replacement value of nearly \$75,000,000.

In the Praetorian Building, 15 stories, started in 1904 and completed in 1908, Dallas can claim the first building of real skyscraper proportions in the Southwest. When the Linz Building, 7 stories, was completed in 1899 it was regarded with awe and visitors frequented it to view our city from its top. Yet today this building and similar structures are but substantial commercial edifices of moderate size when compared with the 29 story Magnolia Building towering 402 feet in the air.

Since 1919 almost a score of large buildings have been added to the skyline which has helped to place Dallas as the 24th city in the Nation in building for past six years with a total of \$111,199,638 worth of construction.

This year will witness the completion of several important buildings. The Baker Hotel, 18 stories, is being actively pushed and it is hoped to have it completed in time for the State Fair. Two more eight-story units of the Santa Fe Building will add impressiveness to that already imposing structure. The completion of the 22-story annex of the Adolphus Hotel will make this hostelry the largest in the Southwest. Several other important projects such as the Allen Building, 22 stories, and an 8-story apartment hotel on Turtle Creek Boulevard will soon be under way.

Upon the termination of construction now in progress or soon to be started Dallas will have 114 buildings from 5 to 29 stories in height. The present buildings are grouped in the following detailed list:

5 story buildings	38
6 story buildings	19
7 story buildings	10
8 story buildings	15
9 story buildings	1
10 story buildings	4
11 story buildings	3
12 story buildings	4
13 story buildings	2
15 story buildings	1
16 story buildings	1
17 story buildings	1
18 story buildings	4
19 story buildings	1
20 story buildings	1
29 story buildings	1

**Five-story**—Southern Implement Supply Co., Court House, Southern Emerson-Brantingham, A., Fulton Bag & Cotton Mills, Campbell Hotel, Municipal Building, Munger Automobile, Colored Pythian Temple, Dallas Coffin, Hughes Brothers, Federal Glass and Paint, Moline Plow, J. **Twenty-story**—Republic National Bank.

**Twenty-nine-story**—Magnolia Building.

## Grand Opera Performances Enjoyed Here

Dallas has been able to record its marvelous growth through the friendship and patronage of the cities and towns over its trade territory. Among the various services Dallas is performing in return is affording the citizenship of the territory an opportunity to enjoy grand opera. The three Dallas performances of the Chicago Grand Opera Company, held at the Majestic Theater March 2 and 3, marked the only appearance of the company in Texas this season. Due to the limited seating capacity of the theater the underwriters faced a deficit of \$5,000 even with every seat filled for the three attractions, "La Gioconda," "Boris Godunoff" and "Tannhauser." Herbert Marcus is chairman of the Grand Opera Committee of the Chamber of Commerce, under whose auspices the attractions were staged and enjoyed by large audiences. For a week in advance of the opera season Charles D. Isaacs, one of the world's greatest authorities and writers and speakers on musical topics, delivered addresses about the operas, his itinerary being handled by the Retail Merchants' Department of the Chamber.

## Garland Man Wins Contest

M. T. Sharpe, of Garland, won the Dallas County gold medal in the contest staged by the Texas Swine Breeders' Association for raising a ton of meat from one litter of hogs in six months. Sweet clover was one of the principal roughages used by Mr. Sharpe in his scientific feeding schedule, it is reported by A. B. Jolley, county agricultural agent.

W. G. Cullum has endowed a \$1,000 scholarship at Southern Methodist University, this making the eighteenth endowed scholarship at the school.

The Santa Fe Railroad will initiate through sleeper service from Dallas to Brownwood, effective March 15.

Isadore Charninsky has been named assistant manager of the Jefferson Hotel.

## 1925 Committees of the Dallas Automobile Club

At a recent meeting of the Board of Directors of the Dallas Automobile Club, E. C. Bleisi, President, announced the appointment of the committees to serve for 1925.

The Dallas Automobile Club has undertaken a heavy program for 1925. The Legislative Committee, under John H. Awtry, Chairman, is undertaking to destroy certain bills being introduced at Austin which are detrimental to the automobile owner.

The committees, with their chair-

men, follow, carrying of complete personnel being prevented by lack of space:

Legislative Committee—John H. Awtry, Chairman.  
Highway Committee—E. D. Balcom, Chairman.  
Lateral Roads Committee—W. C. Marshall, Chairman.  
Publicity Committee—W. Hatcher Thomas, Chairman.  
City Ordinances Committee—A. Ragland, Chairman.  
Traffic Committee—Ben Thorp, Chairman.  
City Streets Committee—R. A. Ferris, Chairman.  
Sunday Tours Committee—Jess Illingsworth, Chairman.  
Tourist Camp Committee—Dr. Landon C. Moore, Chairman.

Chamber of Commerce Committee—E. C. Bleisi, Chairman.  
Viaduct Committee—Frank Rogers, Chairman.  
Tourist Bureau Committee—F. L. Euless, Chairman.  
Safety Committee—Price Cross, Chairman.  
Entertainment Committee—Chas. W. Padgett, Chairman.  
Finance Committee—Ray Nesbitt, Chairman.  
Road Service Committee—Jno. E. Morris, Chairman.  
Road Marking Committee—Jack Freeze, Chairman.  
Auditing Committee—Geo. R. Angell, Chairman.  
Auto Sparks Committee—I. I. Lorch, Chairman.  
Membership Committee—C. E. Swalwell, Chairman.

## WATCH DALLAS GROW

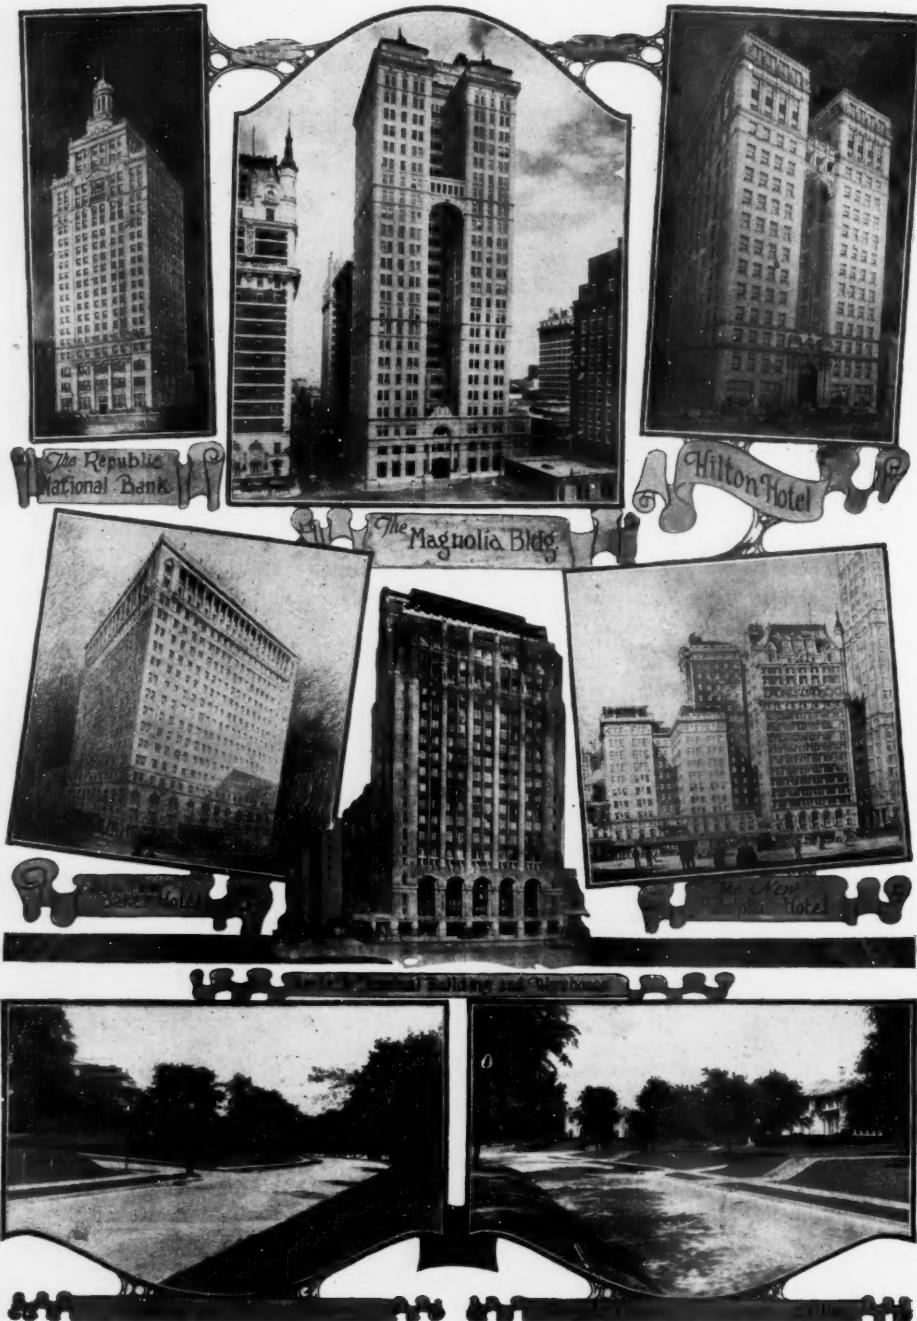

BEGINNING with this issue, "Dallas" will publish monthly such statistics as tend to show the state of business conditions in this city and illustrate the steady growth of Dallas. The following figures show the greater volume of business for January and February of 1925 over the corresponding period of 1924: Increases: Bank Clearings, \$91,740,316; Bank Debits, \$90,332,000; Real Estate Transfers, \$1,859,709; Postal Receipts, \$37,948.34. Decrease: Building Permits: \$125,842. Since February of last year 4,884 new electric light connections have been made, 4,079 water connections, 5,169 gas connections and 5,443 telephone connections.

As an index to the growth in population the following figures will be of value. The ratio of the public utility connections to the population as shown by the 1920 Federal Census was: 5.9 gas meters to each individual; 6.02 water meters; 5.92 electric light meters; 4.94 telephone connections. The City Directory published in November, 1924, gave this city an estimated population of 248,800 and, taking the additional meters installed since that date, multiplying by the above ratios and averaging, shows that Dallas has added approximately 6,749 people. This would give Greater Dallas an estimated population on February 28th, 1925, of 255,549.

## Visiting Realtors Are Loud In Their Praise for Dallas

DALLAS always impresses convention visitors, but the delegates to the recent mid-winter convention of the National Association of Real Estate Boards appear to have been particularly pleased with the city and the entertainment given them. Scores of letters have been received from visitors by Frank McNeny, chairman of the committee from the Dallas Real Estate Board in charge of the convention. Realtors are the world's greatest experts on judging cities.

Walter E. Lang, of Manchester, N. H., was so pleased that he wrote back to the Chamber of Commerce, asking for full printed matter about Dallas to show to friends, and enclosing a check in payment of a subscription to "DALLAS," official Chamber magazine.

"The best winter meeting the National Association has ever had, and the way you took care of every one was fine," so ran a paragraph from a letter to McNeny from I. Shuler, Omaha, Nebr.

"This was my first look-in on your wonderful city and I was greatly impressed with the energy and enterprise of its citizens," said W. W. Garland of Los Angeles.

"To say I was impressed most favorably with the wonderful development in Dallas, both in your commercial and residential districts, would be putting it mildly," was one of the statements of Meyer Eisman, of New Orleans. "You have developed a great city, the future of which is assured by the magnificent strides which you have made in all directions. The splendid hospitality extended to us was doubly appreciated by me because you know, it has been said, New Orleans also knows just a little about entertaining."

### Sees Million by 1940

TO all the delegates, and particularly to California, was Texas and the great city of Dallas a revelation, and it is within the bounds of reason to see Dallas a city of half a million within ten years and a million by 1940," said Glenn D. Williamson, secretary-manager of the California Real Estate Association, Los Angeles.

"You and your associates have created of the visiting Realtors more than 300 salesman for the city of Dallas," was the promise of Arthur E. Curtis, convention secretary of the National Association of Real Estate Boards, Chicago.

"I cannot imagine any group of men going into a city for a few days and leaving same with finer impression of the city and the hospitality of her people than have the Realtors who have just visited Dallas," was the statement of J. C. Taylor, Kansas City.

"We certainly were royally entertained and I am sure you all instilled in the hearts of all visitors a love for Dallas and its hospitality," said Paul G. Maurer, of St. Paul.

"The generosity of the Texas Realtor is symbolic of what is always written about the 'great open spaces, where men are men,'" said William H. Gardner, of Winnipeg.

"I am bubbling over with enthusiasm for Dallas and the visible evidence of its great growth and prosperity, and particularly the spirit that seems to be universal in your city—what was described to me as the 'Dallas Spirit,'" was the tribute of George P. Dykman, of Camden, N. J.

## Traffic Bureau of Chamber Gets Things Done

RECENTLY news was carried of the recommendation of Examiner W. A. Disque, of the Interstate Commerce Commission, in favor of the requests made by the Traffic Department of the Dallas Chamber, in co-operation with other agencies, for a complete revision over rates as affecting Dallas. This victory will likely result in benefits for Dallas so great as to be almost incalculable.

And now several other important accomplishments of the Traffic Department of the Chamber may be chronicled. The dairy and poultry interests of the State will be greatly benefited by a decision of the Interstate Commerce Commission preventing increased rates on such products shipped out of the State. As an example, the decision means a saving of \$140 a car on live poultry shipped from Texas to New York City. Since about 3,000 cars of such poultry are shipped by Texas to New York annually, this would mean a saving of some \$420,000 a year on this one item to this one market. The Dallas Chamber was the leading prosecutor of this case.

Still another recent decision in

which the Dallas Chamber was most active was in the matter of express rates, recently appearing in the press. The action means a saving of at least \$100,000 to Dallas retailers annually, it is estimated.

Dallas wholesalers are assured 50% speedier service into the West Texas territory served by the Santa Fe through the addition of nine package cars out of Dallas by that road. The cars began operation March 1. This highly appreciated additional service was worked out in detail following a conference with Santa Fe officials and a visit to Santa Fe freight concentration points by A. L. Reed, traffic counsel of the Chamber of Commerce.

Still another matter on which the Chamber of Commerce long has been working is the entrance of the Fort Worth & Denver City Railroad into Dallas. Within a short time plans are to be announced for a celebration here in honor of the arrival of the first Fort Worth & Denver train. Direct connection with Denver long has been desired by Dallas.

—o—

### Clean-Up Week Dates

The State Board of Health has designated the week beginning April 5 as clean-up and health promotion week throughout Texas. County health officials, mayors and school and civic organizations are urged to co-operate with the State Board of Health in cleaning their towns from cellar to attic.

## Texas Almanac Tells All About a Great State

Almost every phase and side of Texas are covered in the new edition of the Texas Almanac, issued last month by the Dallas News. It is the first copy of the book to be put out since 1914. It has 448 pages, of which nearly 400 are devoted to facts and figures about Texas. A chapter is devoted to Dallas and Dallas County. The Chamber of Commerce also carried a page advertisement in the interest of Dallas.

## Newsy Notes in Chamber Circles

Cullum and Suwal Win—T. M. Cullum, Jr., son of A. W. Cullum of the A. W. Cullum Grocery Company, and Joe Suwal of the Titche-Goettinger Company, working as a team, were the winners in the recent Chamber of Commerce membership campaign. The contest was to see who would secure the largest number of new members. A loving cup has been presented to each.

**Goodwill Tour Dates Set**—A. P. Johnston, of the Southern Implement Supply Company, has been elected chairman of the 1925 Goodwill Tour of the Dallas Chamber of Commerce and the train will leave Dallas Tuesday night, April 7. It will be an all-Texas tour, swinging through the eastern part of the State. The Dallas evangelists will travel approximately 1,500 miles. The itinerary will be published later in this magazine. Subcommittee chairmen assisting Mr. Johnston are as follows: Entertainment, Fred McJunkin; general arrangements, C. L. Norsworthy; itinerary, C. L. Norsworthy; parade, George H. Bird, grand marshal; personnel, M. J. Norrell; finance, Hugo Schoellkopf; hat and badge, J. Durrell Padgett.

**Manufacturers to Meet**—In connection with the annual convention of the Texas State Manufacturers' Association, to be held here during the week of May 25-30, there will be staged a State-wide manufacturers' exposition, it is announced by G. M. Knebel, of San Antonio, executive vice-president. According to tentative plans, the Automobile and Manufacturers' Building at Fair Park will be used and Mr. Knebel will open an office in advance at the Chamber of Commerce.

**Dallas Men Speak**—Showing the friendly feeling neighboring towns have for Dallas, a number of requests have been received by the Chamber of Commerce recently for Dallas men to deliver addresses, chiefly before annual meetings or other sessions of Chambers of Commerce. Among such requests that have been filled, with the Dallas men responding, are the following: Gainesville, M. J. Norrell; Hugo, Okla., James Z. George; Electra, Frank E. Moran; Mesquite, DeWitt McMurray; El Dorado, Ark., James Z. George; Farmersville, J. F. Kimball and A. B. Jolley; Athens, Charles Saville.

**Valuable Radio Program**—A series of addresses was arranged recently by the Rotary Club, in co-operation with Station WFAA of the Dallas News and Journal, entitled "The Spirits of Dallas." The messages broadcast were designed to be of interest to the Southwest. President T. M. Cullum and General Manager Charles Saville, of the Chamber of Commerce, co-operated in the program, speaking on the following subjects, respectively: "Commerce and Industry," "Service to the Southwest."

**Big Four Officials Here**—Eight executive officers of the Big Four-New York Central Lines, visited Dallas for two days last month on a tour of the Southwest and were entertained at luncheon and golf by the Transportation Department of the Chamber of Commerce. "The untouched resources of Texas are tremendous and by co-operation of all branches of industry from producer through transportation to the consumer, even greater prosperity here is certain to follow," said H. A. Worcester, of Cincinnati, vice-president of the Big Four lines.

**Fire Prevention Urged**—That 80% of America's \$5,000,000,000 annual fire loss is preventable, was the statement of Franklin H. Wentworth, of Boston, representing the Fire Waste Council of the U. S. Chamber of Commerce, in the feature address before the annual appreciation dinner of the Manufacturers' Association of the Dallas Chamber of Commerce. J. A. Gage was chairman at the meeting which was attended by some 300 manufacturers and their department heads, the latter being honored at the meeting. He was introduced by B. A. Evans, president of the association. Mr. Wentworth made an appeal for greater fire prevention work in Dallas. Mr. Wentworth conferred while here with T. E. Jackson, chairman of the recently appointed special fire prevention committee of the Chamber.

**Dallas in London Times**—Dallas was visited by representatives of the London Times last month and data for stories on Dallas was furnished them by the Publicity Department of the Chamber of Commerce. The London Times is to issue a special edition honoring the Associated Advertising Clubs of the World in connection with the annual convention at Houston in May, at which time the edition will be furnished each delegate.

**Change in Field Workers**—Jean E. Thweatt, who has been in charge of the Membership Department of the Chamber of Commerce, has resigned to enter the insurance business. Recently John Munns, well known in the local automotive field, began service with the Chamber in membership work.

**Chamber Official Speaks**—Colvin B. Brown, chief of the organization service bureau of the U. S. Chamber of Commerce, which has South Central headquarters at Dallas, addressed a round table conference here on February 24, arranged by the Dallas Chamber of Commerce. Prior to the conference the Dallas Chamber was the host to the visitors at a luncheon. The Chamber of Commerce officials from various cities and towns in this section in attendance were as follows: C. P. Dodson, of Decatur; J. F. Costellau, of Ennis; Joe Bradshaw, of

Plano; C. W. Smith, of McKinney; J. E. Chambers and Carl Miller, of Lewisville; Will Edwards and George N. Rucker, of Denton; F. E. Hendricks, of Richardson; O. C. B. Nau, of Corsicana; J. B. Crum, of Mesquite; C. F. Dumas and W. N. Miner, of Waco; O. H. Olinger and E. A. Bell, of Marlin; W. W. Evans, of Sulphur Springs; Ray Holden, of Lancaster; C. L. Chastain, of Carrollton; C. L. Jamison, of Garland; W. D. Lucas, H. A. Ramsay and F. E. Flayer, of Irving; H. O. Tatnum, of Wortham; John Boswell, of Plainview; Bert Graham, of Waxahachie; C. R. McLeod, of Garland; W. C. McKamy, of Richardson, and R. E. Roberts, of Carrollton.

### United States Lines Open in Dallas

The United States Lines have opened an office at 513 Thomas Building to solicit transatlantic passenger business. This is the first exclusive transatlantic passenger office opened in the Southwest. The United States Lines are managing operators for the United States Shipping Board. Their fleet is headed by the Leviathan, the world's largest steamship. Among the other large vessels operated by this concern are "George Washington," "America," "Republic" and the several "President" ships. Regular sailings are maintained between New York and the principal ports of Great Britain, France and Germany. The local office is in charge of K. C. Schreiner, Dist. Passenger Agent.

### Standards Bureau Moved to Dallas

Dallas has become headquarters of the division of standardization of the American Petroleum Institute. C. A. Young, director in charge, has been transferred here from New York and is maintaining headquarters at 1229 Kirby Building. "Dallas was selected because it is the most centrally located city in the Mid-Continent oil territory," said Mr. Young. J. Edgar Pew, of the Sun Company, president of the American Petroleum Institute, is given credit by Mr. Young for having largely influenced the establishment of the office here.

### Dallas Cleaners and Dyers Comprise Big Industry

The cleaning and dying industries of Dallas represent a combined investment of more than \$2,000,000 and employ some 1,500 men and women, with payrolls approximating \$1,500,000 annually, it is reported by W. E. Kennedy, executive secretary of the recently organized Associated Cleaners and Dyers, Inc., of Dallas. The association, which comprises the majority of the industries in that field, was formed to elevate the standards of the industry and to increase efficiency in the various plants. Headquarters are maintained in the Santa Fe Building.

### S. M. U. to Add Engineering and Law Schools

Plans for a law school for Southern Methodist University are about complete. The Dallas County Bar Association has been co-operating with the school administration and it is hoped to add this new department by the opening of the fall term. Due to lack of building facilities at the University itself, the classes will be held downtown. Eminent Dallas lawyers will serve, without pay, as instructors, and it is hoped to make this course one of the most efficient in the Southwest.

The Dallas Technical Club is active

in making arrangements for a co-operative school of engineering that will be available to fifty students the first year who desire to take the course while holding positions with engineering and technical firms. It is a school to be conducted along the lines of the co-operative institutions now maintained with marked success at other colleges and universities. The School of Engineering will be housed in the new Hyer Physics Building, to be under construction within the next few weeks. Students at this school will alternate between practical work with Dallas concerns and the study of the theory at the University.

### DALLAS MUNICIPAL BAND

Office: 108 N. Poydras St.

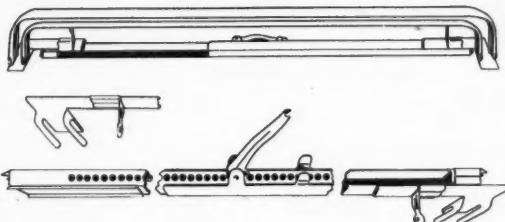

Phone: X-8248

This is an Open Shop Band composed of high class musicians who have proven themselves loyal to Dallas institutions. When union musicians boycotted the State Fair last year, this Band furnished music.

In arranging for conventions or other meetings use these men. This organization can also furnish you a dance orchestra as good as you will find in the entire city. Phone X-8248

## Construction Races With Demands of Dallas' Growth

**B**UILDING permits for the incorporated limits of Dallas for the month of February totaled \$2,147,552, bringing the total for the two months of 1925 to \$5,085,828, or about \$50,000 ahead of the corresponding period of 1924. In construction so far this year, just as in totals for all of last year, Dallas is easily ahead of all cities south of St. Louis.

Of keen interest in both construction and business circles is the news that the structure to be erected by Judge Arch C. Allen and associates at Commerce and Ervay Streets is to be an office building instead of a hotel, as originally planned. It is to be 18 stories, with 357 offices on the upper 17 floors, and will cost approximately \$1,500,000. The Mid-West Company are the architects and the Rice Construction Company the contractor.

Recommendation for the erection of a new courthouse costing \$3,000,000 and a hall of records costing \$900,000 has been made to the Dallas Bar Association and its building committee by a committee from the North Texas Chapter of the American Institute of Architects.

Announcement has been made that plans have been completed for the erection of an 8-story and basement apartment building on Turtle Creek boulevard in Oak Lawn. Work is expected to start within a few weeks on the \$750,000 structure, according to Jack Bradley, one of a group of five Dallas men who will form the owning company. It is to be built on a tract of about an acre in the 4100 block on Turtle Creek. The plans of Thomson & Swaine, Dallas architects, call for the Spanish renaissance type of building. It is the plan of the builders to make the apartments semi-co-operative, allowing tenants to purchase their individual apartments on a net payment equivalent to six years' rental.

Contract has been let to H. T. Apple and work started on the erection of the new \$150,000 plant of the Dallas Milk Company on Leonard Street between Juliette and Flora. It will

be of reinforced concrete and brick, 52x102 feet. F. M. Christiansen is president of the company.

Work has been started by Henger & Chambers, the contractors, on the 22-story addition to the Adolphus Hotel, that will bring the facilities of that hostelry to 825 guest rooms, or larger than any other Texas hotel. Alfred C. Bossom of New York is the architect.

One of the largest permits granted last month was \$500,000 for the new municipal auditorium at Fair Park, which is to seat about 6,000 people. A. J. Rife is the contractor. Work is under way on the structure.

## T. & P. to Spend \$1,500,000

THE Texas & Pacific Railway will expend more than \$1,500,000 on two freight terminal yards in Dallas this year, it is announced by President J. L. Lancaster. A 1,000-car yard is being constructed east of Fair Park and a smaller yard is being laid out in West Dallas. Removal of the present freight yard on North Pacific avenue near Oak and Walton Streets will follow the completion of the two new yards, Mr. Lancaster said. The East Dallas terminal will include repair shops and roundhouse. Business

of the railroad has doubled here during the past five years, it is understood.

The survey conducted by G. L. Miller & Co., Atlanta, shows that in the entire South but three cities exceeded Dallas in building permits in 1924, these being Baltimore, Washington and St. Louis.

The Texas Drug Company has announced the immediate erection of a three-story building at the northwest corner of Browder and Marilla Streets, to be occupied by the wholesale firm Sept. 1. It will cost approximately \$200,000. Whitson & Dale are the architects. J. T. Coulson is president of the company, which has a capital stock of \$360,000.

Plans for the erection of a three-story fireproof building, 95x116 feet, on Pearl Street just north of Live Oak, have been announced by the Nash-McLarty Motor Company. The property was purchased for \$30,000 and the building is to cost \$50,000. It is to be occupied by the service and used car rebuilding departments of the company.

Erection of a large building to house the recently announced retail department of Sears, Roebuck & Co.,

## Giving the Telephone Life

WHEREVER your thought goes, your voice may go. You can talk across the continent as if face to face. Your telephone is the latch which will open any door in the land, to you.

There is the web of wires; the many switchboards; the maze of apparatus; the millions of telephones. All are parts of the great system which provides nation-wide telephone service. The equipment has cost over two billion dollars. But more than equipment is needed.

There must be the guardians of the wires to keep them vital with speech-carrying electrical currents. There must be the thousands of operators to watch the millions of tiny switchboard lights. There must be skilled workers of every sort to construct, repair and operate.

A quarter of a million men and women are united to give nation-wide telephone service. With their brains and hands they make the Bell System live.

*Let Natural Gas  
Solve Your Fuel Problems*

## LONE STAR GAS COMPANY

South's Largest Wholesaler of Natural Gas

**E**VEN IN NEW YORK, where gas costs \$1.15 per thousand cubic feet, and where the bitter cold often lasts for weeks at a time, the Gas-designed Furnace is considered the most economical household heating system.

How much more then can this money-saving method be appreciated in Dallas, with its natural gas.

## THE DALLAS GAS COMPANY

## Two And Three Quarter Million Dollars

had been returned to policy-holders by the Texas Employers' Insurance Association up to the beginning of this year. The act of Legislature which created this Association made it imperative that all profits be so returned, less a reasonable surplus to insure permanency. There is no reason why each insurance company might not return excess premiums in this manner, but—the Texas Employers' Insurance Association does it!

The restricted territory in which this Association operates—only in the State of Texas—eliminates much expense in securing business. Its operating expenses are much lower—its average losses must be the same as those of others. The difference between operating expenses and premiums paid is the amount of excess premiums collected according to specified rates. It is the amount in excess of the cost of adequate protection. It belongs to policy-holders. This Association returns it to its owners.

This is an important reason why this Association writes a larger portion of the compensation insurance of this State than any other insuring medium—it is furnished at cost, and the cost is lowest.

Our Directors, who have voluntarily associated themselves in this endeavor to reduce the cost of such protection, ask the employers of Texas who are not now associated with them to join this movement, which has for its object the general good.

Now—

A twelve million dollar investment in Dallas

THE towering white smokestack at the foot of Griffin Street marks the site of Dallas Power and Light Company's modern electric generating station with a capacity of 35,500 KW., part of a twelve million dollar investment.

From this generating station, electricity is sent out via overhead wires and underground cables to substations in Oak Cliff, downtown Dallas, East Dallas, and North Dallas, for reduction of voltage and efficient distribution to different types of customers, some using electric service for lighting purposes only, others for lighting and power, and the street railway for transportation.

The distribution facilities consist of several large buildings for various purposes, in addition to 504 miles of overhead wires and poles and five miles of underground cables which are gradually replacing overhead equipment in the downtown district.

Behind the Switch

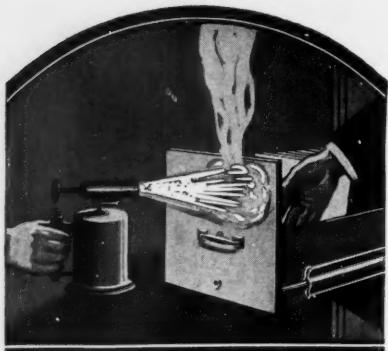

Electric service covers more than the mere delivery of electric current to each customer.

It includes the contracting for service, reading meters, rendering bills, making tests, recommending efficiencies, etc.

A large army of men and women are required to handle this vast amount of work, and the annual pay roll of Dallas Power and Light Company is over one million dollars.

Seven years ago Dallas Power and Light Co. had less than half the present amount of money invested. Within this period, in order to keep apace with the growth of Dallas, it was necessary to obtain this additional capital and also utilize it rapidly that adequate service might be provided.

Dallas Power & Light Company

## Why doesn't the heat come through?

ASBESTOS is the answer. The hot flame quickly heats the steel wall. But this is a "Y and E" Fire-Wall Steel File and between its two walls of steel is an insulating layer of protective asbestos.

### Asbestos will protect your records, too

When you buy steel files, why not buy the utmost in fire protection? "Y and E" Fire-Wall Steel Files are offered in sections for all sizes and kinds of records. See them at the nearest "Y and E" Store or mail the coupon.

Russell Grader Manufacturing Co. of Texas, 2003 S. Harwood St.

## ROOFING CONTRACTORS

Dougherty Roofing Company, Magnolia and Hord Sts.

## Cotton Mill Industry Grows in South

How leadership in the cotton mill industry is shifting from the New England States to the South is shown in an article by Richard W. Edmonds, editor of the Manufacturers' Record, in a recent issue, an excerpt from which follows:

In 1880 the South had 687,066 active spindles and 14,754 active looms, while the rest of the country, which means New England principally, had about fourteen and a half times as many, or 9,966,369 active spindles and 211,005 active looms. In 1923 the South had 16,334,000 active spindles and 305,577 active looms, while the rest of the country had 19,916,000 active spindles and 390,040 active looms.

The number of cotton spindles active during December, 1924, in the cotton-growing States of the South was 16,785,629, compared with 14,278,058 active spindles in the New England States; or, strictly speaking, last December the cotton-growing States of the South had 2,507,571 active spindles more than the reported active spindles of New England. On Dec. 31, 1924, the cotton-growing States of the South had 17,359,420 spindles in place, compared with 18,561,220 spindles in place in the New England States, but the active spindle hours for December in the cotton-growing States was 4,624,716,928, or 266 hours per spindle in place, while New England reported 2,867,153,619 active spindle hours, or only 154 hours per spindle in place.

## Building Greater Dallas

The Dallas Railway Company is keenly appreciative of its responsibility for furnishing the type and extent of service which is essential for the well rounded growth of Dallas.

We miss no opportunity to give the kind of service that Dallas deserves, so far as our means permit. Our effort is dependent largely on the co-operation we receive from all who profit by good street railway service.

BEAUTIFUL HOMES IN FOURTH INSTALLMENT OF HIGHLAND PARK

## Keeping up with busy Dallas

Joe E. Lawther has been appointed to membership on the City Plan Commission, filling the vacancy caused by the resignation of W. H. Wray.

\* \* \*

Judge Royal R. Watkins was elected commander of the Texas division, Disabled Veterans of the World War, at the annual convention held here last month.

\* \* \*

The Dallas branch of the Congoleum-Nairn Co., Inc., won the efficiency contest cup for 1924, the contest being based principally on salesmanship and general efficiency of organization. The Dallas branch competed against the ten other divisions into which the United States is divided by the company. C. A. Williams is district manager for Dallas.

\* \* \*

Frank V. Lanham of Dallas has been appointed chairman of the State Highway Commission by Governor Ferguson. Other members of the Commission are John H. Bickett, Jr., San Antonio, and Joe Burkett, Eastland.

\* \* \*

The Dallas Country Club has elected L. R. Munger president, and re-elected Charles C. Hall secretary.

\* \* \*

"Dallas, the financial and commercial center of the Southwest," is featured in views and statistics published in a booklet by the North Texas Trust Company, Everett S. Owens, president. The booklet is designed to show the desirability of Dallas real estate mortgages.

\* \* \*

Matt Gill of Dallas recently was appointed British Vice Consul to Dallas. A dinner in his honor in this connection was given last month by Mike H. Thomas, with more than 100 in attendance.

\* \* \*

Dr. H. W. Matthews has been re-elected president of the Dallas Camera Club, with E. H. Brown elected secretary, succeeding A. M. Belsher.

\* \* \*

Directors of the Republic National Bank have voted to increase the capital stock of the bank from \$1,500,000 to \$2,000,000. A meeting of the stockholders will be held March 16 to ratify the decision. The increase will bring the combined capital stock of the 14 National and State banks in Dallas to \$15,100,000.

\* \* \*

The Dallas News has been chosen as the newspaper representing the Southwest in the new method of using newspapers from various sections of the country to replace textbooks in the course in journalism at Mount Holyoke College, Mass.

\* \* \*

The Citizens' Union Terminal Committee, organized in May, 1911, for

the purpose of securing the present Union Terminal Station for Dallas, was dissolved the past month when Chairman Alex Sanger addressed a final communication of thanks for their efforts to Royal A. Ferris and Louis Lipsitz, the other members of the committee. The committee held more than 200 meetings in connection with their work.

\* \* \*

Roy C. Henderson, who recently came to Dallas to assume the management of the A. E. Perkins Corporation, reports that the concern has moved from its location on Elm Street and is now located in the industrial district, with ample trackage and room for expansion. Production facilities of this shoe polish manufacturing concern have been increased from 1,800 to more than 5,000 bottles daily. Mr. Henderson promoted the well-known Dyanshine organization at Waco.

\* \* \*

E. M. Schenecker of Fort Worth was re-elected president and C. G. Quillian of Dallas was re-elected secretary of the North Texas Wholesale Grocers' Association, which held its annual convention here last month with some 50 in attendance.

\* \* \*

The Helm-Burks Motor Company, comprised of T. A. Helm and David F. Burks, succeeds Foster P. Jennings as local distributor for the Hupmobile.

\* \* \*

Announcement has been made by President C. E. Calder, of the Texas Power & Light Co., that the company will issue and sell \$2,000,000 in first mortgage bonds and \$500,000 in preferred stock to finance improvements announced or planned.

\* \* \*

E. M. Elliott, formerly an official of the Santa Fe Railroad located at Galveston, has been named manager of the new \$5,000,000 Santa Fe Terminal group of buildings. T. P. Roberts will continue as a director of the Terminal Building Corporation of Dallas in charge of leasing space in the terminal.

\* \* \*

The Dallas Torch Club was organized the past month with the following officers: J. M. McCormack, president; Dr. Robert S. Hyer first and Dr. David Lefkowitz second vice presidents, respectively, and Edward Crane, secretary-treasurer. Meetings probably will be held once a month and in the evenings.

\* \* \*

The Santa Fe Railroad has removed its city ticket office from 110 Field Street to the New Santa Fe Terminal Building, and the Fort Worth & Denver Railroad will use the space vacated by the Santa Fe.

## Business Opportunities

The Chamber of Commerce is constantly receiving letters from manufacturers looking for reliable agents in this territory. Perhaps you are interested or know of some one who could represent them. Full information can be obtained from the Chamber of Commerce.

Jobber to handle two candy specialties, manufactured in bar form. Refer to No. 119.

School Children To View  
Educational Film

**M**OTION pictures depicting outstanding American industries are being shown to the school children of Dallas under a plan worked out by the Junior Chamber of Commerce, co-operating with the school authorities and the Palace Theatre.

A film entitled "Play Safe" was secured from the U. S. Bureau of Mines at Pittsburgh and used in various elementary schools of the city under the supervision of Supervisor Peeler. This film stressed the necessity of safety devices and safe practices in the home, on the street, and in the factory.

"The Story of Iron" from the Bureau of Mines and a film entitled "Cotton" were shown free of charge to school children in a special matinee on Saturday morning, February 28th. The film of cotton was made locally by the Jamieson Film Company. It showed the numerous processes through which the fabric passes from the cotton field to the finished garments. It was made in co-operation with the Miller Manufacturing Company in their plants at Dallas, Waco and McKinney.

Films on "Oxygen" and on "Natural Gas" will be shown in April and May, respectively. Other pictures that have been shown in this series are: "The Story of Sulphur," "The Story of Coal," "The Story of Fire Clay Refractories," "The Story of Petroleum," and "The Story of Gasoline."

## CITY PLANNING STRESSED

(Continued from page 10)

road system are fully alive to the possibilities as well as the future needs of Dallas and to the end that we can confidently expect even greater consideration and co-operation from them in the future than we have enjoyed in the past.

The officials of the Southern Pacific, Texas & Pacific and Missouri-Kansas-Texas, as well as other systems, all evidence by their present activities that they also are fully aware of the great volume of business that it will be necessary to provide for here, and we have every reason to believe that, with a continued and proper co-operation from the citizenship of Dallas, these great transportation systems will not only fit themselves to handle the greater volume of business we know will materialize, but we also want to urge that all of these systems be encouraged to anticipate in advance and provide that which will be required of them.

## Trolley Company Lauded

THE committee has also given some attention to the question of city transportation. Obviously, a consideration of the needs of Dallas for the next twenty-five years would be incomplete if this important subject was not given consideration. It is quite generally conceded that street car facilities and service now enjoyed in Dallas are comparable with that of any city of our size in the country. This condition reflects great credit upon the management of the Dallas Railway Company, as well as upon the City Commission and Supervisor of Public Utilities. The question has been raised as to whether or not the present franchise, coupled with the short time agreements being made between the city and the railway company, are such as to permit the railway company to properly finance the extensions that should be under more or less constant construction, in order to anticipate the rapidly growing requirements of the city and its environs. The committee feels that this is an important subject, and we believe that the present status of affairs might be materially improved if definite commitments could be made and agreements arrived at that would make it possible for the railway company to more effectively finance the extensions and improvements that will all the time be necessary, in addition to maintaining the present standard of service; all of which should be done in such manner as to properly protect the interests of the public.

## For More Manufacturing

AS a great distributing center there is of necessity a limit to the growth and development of Dallas, but as a manufacturing center there is no limit.

Furthermore, the principle of manufacturing the finished product as near as possible to the source of production is fundamentally and economically correct.

There is no sane reason why we should ship cotton to New England or the Southeastern States to be manufactured into cloth, paying freight

in both directions and profits to various handlers. Nor is there any reason why we should ship cucumbers, onions and cauliflower by the carload to Pittsburgh, nor fruit and vegetables by the trainload to Eastern manufacturing centers to be canned and preserved and returned at high prices.

All of these things can and should be manufactured in Texas, reducing the cost to the consumer and at the same time increasing the price paid for farm products.

## Guarding Investments

IT is urgent that something be done to check the ever-increasing volume of money that is annually invested in worthless stocks of fly-by-night concerns that offer large returns. Our Better Business Bureau is already active along these lines and their efforts should be supported by every one.

Dallas should lead in a movement to encourage the investment of Southwestern money in sound local business and industrial enterprises in the Southwest and the committee recommends the establishment by private capital of a large trust company or financial institution to deal exclusively in high-class stocks of Southwestern corporations. With a sufficient staff of economic and industrial experts such a concern can foster, direct and build up worthy institutions to the mutual profit of industries and investors and to the general good of the community.

## CONSTRUCTION RACES WITH DEMAND

(Continued from page 19)

is contemplated, it is announced by H. M. Rubel. It is understood the structure will adjoin the present quarters of the concern on South Lamar Street.

Proposed immediate erection in the M-K-T. industrial district of two large warehouses and office buildings to be occupied respectively by the Graham Paper Company and the Piggy-Wiggle Stores, Inc., has been announced by John J. Simmons, owner. Bids for the erection of the buildings are now being taken by J. A. Pitzinger, architect. The building for the Graham Company is to be four stories and to be located at the northwest corner of Griffin and Baron Streets, while the one to be used as a warehouse by the grocery concern is to be three stories and located just north of the other structure.
